

MOULYA K M

B.E. Artificial Intelligence & Machine Learning | Python & Software Development

Bengaluru, Karnataka | +91 7022686023 | kmmoulya3@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFILE

Second-year Artificial Intelligence and Machine Learning undergraduate with a 9.57 CGPA and hands-on experience building Python and web-based applications. Completed a Python development internship and developed projects spanning AI-assisted regulatory compliance, progress tracking and civic issue reporting. Interested in software development and practical AI applications.

EDUCATION

New Horizon College of Engineering, Bengaluru **CGPA: 9.57**
Bachelor of Engineering (B.E.) - Artificial Intelligence & Machine Learning | Second Year
Semester 1 SGPA: 9.75 | Semester 2 SGPA: 9.40

TECHNICAL SKILLS

Languages: Python, C, JavaScript

Web: HTML, CSS, JavaScript

Tools & Technologies: Git, GitHub, VS Code, Streamlit, Gemini API, JSON

Python: File handling, exception handling, modules and packages

EXPERIENCE

Python Development Intern - SaiKet Systems **Aug 2026 - Sep 2026**

- Completed a remote Python development internship focused on applying core programming concepts through practical assignments.
- Built solutions involving JSON data handling, file processing, word-frequency analysis, number-based logic, currency/exchange tasks and web scraping.
- Completed all assigned development tasks and received an internship completion certificate.

PROJECTS

PackCheck AI - Smart India Hackathon 2026 **Python | Streamlit | Gemini**

- Developed an AI-assisted compliance prototype that extracts packaged-product label information from images/PDFs using Gemini and evaluates applicable declarations through a rule-based compliance workflow.
- Integrated category-aware checks and official-verification workflows, including FoSCoS support for food products, to distinguish AI extraction from source-backed verification.
- Implemented structured inspection results, report history and PDF reporting in a Streamlit interface designed for practical compliance review.

CodeJourney - Personal Progress Tracker **Python | JSON**

- Built a console-based application that stores daily coding activity, topics, problems solved and study hours in JSON and summarizes cumulative progress through a dashboard.

CityPulse - Urban Issue Reporting Platform **HTML | CSS | JavaScript**

- Developing a browser-based platform for reporting civic issues such as waterlogging, garbage, street-light failures and road damage, using structured JavaScript objects and interactive front-end behavior.

LEADERSHIP

Class Representative - First Year **2025 - 2026**

- Represented the class across both semesters, coordinating student-faculty communication and supporting academic and class-related activities.

CERTIFICATIONS & LEARNING
